

PROJECT CASE STUDY

Bunzl Greenham

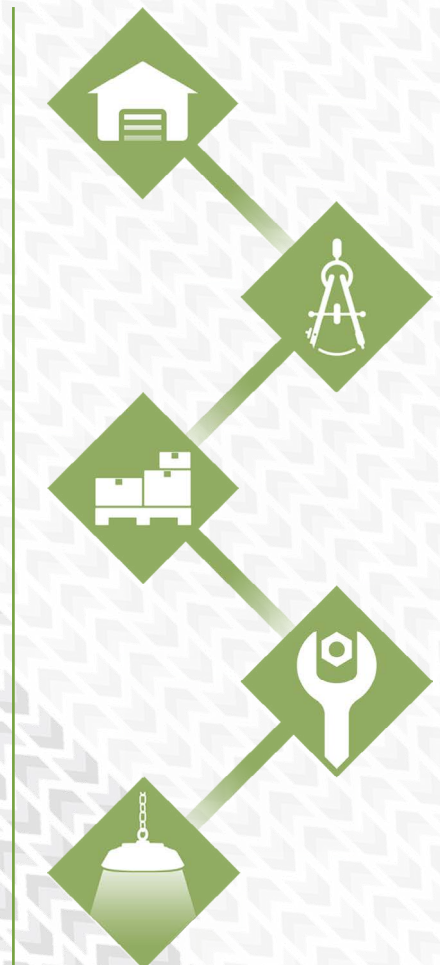

Bunzl Greenham is the UK's leading safety and workplace supplier, part of Bunzl plc, a global FTSE 100 company. They specialise in the supply of personal protection equipment (PPE), cleaning and hygiene supplies, and contractors' site equipment. **Kellwood LED Lighting** were recently tasked with upgrading one of Bunzl Greenham's premier trade warehouse and office complexes.

Challenges

It's perhaps not surprising that a company specialising in supplying PPE had high standards when setting the project brief. Kellwood needed to significantly improve the lighting levels of the main warehousing space to meet the latest health and safety guidelines.

Solution

Reliable, long distance management was important to a project which included commercial offices, industrial warehousing, and retail areas. Kellwood Electrical provided a self-sufficient install team, capable of operating independently while liaising with on-site facility management members. This ensured as smooth a transition as possible.

“

Our new lights are installed throughout and have proved to be a great enhancement in Bunzl Greenham's offices, warehousing and retail areas. Overall lighting costs are set to be reduced by almost 65%. Light levels have been improved considerably. Kellwood offer a very competent service, service-for-price we found them to be excellent value for money.

J. Smith, Bunzl Greenham
