

Kellwood’s lighting and electrical divisions mainly service our client requirements in the commercial and industrial markets. However, our record of professional excellence extends into the public sector as well. Kellwood recently upgraded outdated lighting within Perth prison’s regime and education zones. The Scottish Prison Service selected The Kellwood Group’s turnkey, vertically integrated project solution ahead of stiff competition. Kellwood’s Electrical, Lighting and Engineering divisions worked together. To allow our electrical contractors to install the light fittings on-site, Kellwood Engineering designed and manufactured specialist bracketry to augment the tamper-proof ceiling systems already in place. Despite severely restricted access to the project area and a challenging brief, Kellwood delivered.

“ HMP Perth were very impressed by the professionalism and dedication of Kellwood LED Lighting during the recent upgrade of our lighting systems. The staff of Kellwood were both knowledgeable and professional, and the project was completed on schedule and within budget. The overall service provided by Kellwood’s team was exceptional, and their products are proving to be a great enhancement to HMP Perth.

B. Davidson Contracts Manager, The Scottish Prison Service
